

Curry Leaf Beverage

Invention summary:

Ready to serve beverage made out of curry leaves

Technology overview:

This invention is a ready-to serve beverage made using curry leaves (*Murraya koenigii*). During processing, most of the water soluble nutrients in curry laves are extracted. A heat treatment is applied during the preparation of the beverage as a way of eliminating pathogenic and spoilage microorganisms. The key intention of this invention is to prepare a ready to serve beverage with higher nutritional value during extraction.

Potential application:

Convenient nutritional beverage to optimize health

Advantages of the ready to serve beverage:

- Anti-diabetic and anti cancer properties
- High in antioxidant properties which leads to therapeutic hepatotoxicity
- Good for ethanol induced oxidative stress and reduction of in the elevated levels of liver enzymes
- Good for recovery of malfunction of digestive track
- Contain iron, fiber and vitamins including vitamin A & B.

Patent No : 18030- 2014
